Actually quite scary this game :) havent completed it yet, but so far i kinda enjoy it. Try it out guys, for this price its worth it.. The game has a nice concept and the horror elements are actually creepy, however that's about all it has. The thing I hate the worst about this game are the insta-deaths and dark rooms. Most of the rooms that you have to navigate through are pitch-black. Save points occur rarely, but can be used multiple times. Save EVERY time you see one because you never know when something will come at you and insta-kill you. I really enjoyed the horror elements, but the gameplay and visuals were not appealing at all. Also, it's been a very long time and we still haven't seen an episode 2. Through most of the game you have to explore to figure out what you're doing, however around almost every corner is something that is looking to kill you. It seems very counter-intuitive and makes the exploration not fun. The tricky camera angles ruin the 3rd person camera view. You'll be trying to interact with a specific object, but the camera keeps switching. This makes it an absolute pain to interact/find certain things.. The people making the game went out of business, so Episode 2 will, to my knowledge, never be released. So if you are looking for a game which will eventually be updated or even finished, look elsewhere. Episode 1 itself is rather unpolished, and although it can be fun, it's not worth the price considering the story will never be resolved.. So far so good. That graphics and sound, the atmosphere, and especially the camera angles are highly reminiscent of classic Resident Evil and Silent Hill games. The only downside to the 1st part in my opinion is the final battle (if you can call it that) with the shark, but otherwise this is a good start and I can't wait to see what the rest has in store. If you're hesitant to get this, just keep in mind it's only \$5 and should keep you busy for around 2-3 hrs.. Don't do it. Got it for \$.99 thinking it's just a dollar. That money would have been better off in the trash. Controls are terrible, gameplay in general is crap. It's 2016 and there's no episode 2 for obvious reasons. Ain't worth it.. Okay, the execution of it all was pretty good. The developers took some serious inspiration from Silent Hill with surreal atmospheres, frustratingly deliberate camera angles and view-dependent control schemes. Overall, it was well executed. The reason I do not recommend this game is that it is waaay too short. I know it's only episode 1, but the 2.4 hours I spent playing the game do not warrant the \$5 I spent to get it. Most of 2.4 hours I spent playing this was me repeating the same frustrating chase scene or overly confusing shark puzzle. I know this is titled as "episode 1" but even episodes have resolutions to the stories within them. The story that was started was in no way resolved, and the ending rased way more questions than it did answers. I left the game feeling unsatisfied, and wanting more than I got. While wanting more is usually a good sign, and encourages players to buy the next piece of the series, I don't think I will be buying the next one. Especially if the episode is as short as this one was. If you want to spend \$5 on a very small, albeit well done, content then maybe Long Night is your time. The cut scenes were well done, the atmosphere was spot on, but I honestly feel like the developers could have released more content, or at least fixed a few common bugs in gameplay before release. It's not as if the game is bad by any means. it's actually really good! It just feels more like a long demo than it does a first episode to a series. I really liked the world of Long Night, but I would not buy the next episode unless I was assured there be more content and less glitchy gameplay.. Before you start up the game, it says the experience is more enjoyable with a gamepad. What it should really say is, "Game is impossible unless you use a gamepad." Five minutes into the game and I cannot continue cause that crazywoman who chases you always catches me cause I keep running into walls. Oh and you either have to go full out run or she'll get you, problem with that is if you do that you run out of breath and she catches you anyways. I'm going to put any further playing of this on pause till I can get my hands on a gamepad, when I do I'll update my review. But as of right now, I cannot recommend this game on gameplay. But on idea and story, I will recommend it for anyone who has a gamepad.
